Ex. 6 Personal Privacy (PP) and others,

Many of the cases have some sort of eco narrative, but the template has evolved so many times. Some eco narratives are in a modified-bullet format. Currently we have a hazard paragraph and a risk paragraph for eco (no bullets). To get these cases into the current eco format would take time. Maybe we could approach it in a prioritized way. For example, if the top 5 are going to a decision meeting today, we should focus on them first and not tackle the project in a random way. This would require some level of prioritization of the cases.

Hey all

I've attached a modified list of cases that are our top priority to address. I added a column in yellow with my guess at what RAD needs to do and/or the status of RAD's pieces to the best of my ability. Could you please run through the list ASAP and confirm the status and what needs to happen? Thanks guys!
